

FLEX^Q

Automatic Loading and Unloading System

- Small Foot Print; loading and unloading station in one unit
- Easy set up; only one arm need to be adjusted
- Extreme flexibility; can be used with various grid tester models
- Can be used with customers existing fixtures

TECHNICAL SPECIFICATION

PCB CHARACTERISTICS:

Lenght	16"	406mm
Width	12.8"	325mm
Thickness	0.027" ... 0.095"	0.7 ... 2.4mm

SYSTEM OPERATION:

Set up time	< 10 minutes
Automation cycle time	4 seconds
PCB Transportation mode	with vacuum Arm

INSTALLATION REQUIREMENTS:

Electrical Power	220 VAC +/- 10%	
Frequency	48 ... 60 Hz	
Number of wires	2 + gnd	
Power Consumption	1.5 KW	
Compressed Air	72.5.....101 PSI	5.....7 bar

DIMENSION AND WEIGHT:

Dimension: LxWxH	67" x 37.5" x 55"	1700mmx950mmx1400
Weight	1058 lbs	480kg
